Profile

Highly motivated Second Year Computer Science student at GITAM Deemed to be University with a strong interest in Data Structures and Algorithms (DSA). Seeking opportunities to gain practical experience in algorithm design and problem-solving. Proficient in Python and C with experience in concepts such as sorting, searching, and recursion. Strong analytical skills and a passion for continuous learning.

Skills

Programming Languages:	Python, C, JavaScript
Web Development:	HTML5, CSS3, Responsive Web Design
Core Computer Science:	Data Structures, Algorithms, Object-Oriented Programming, Problem Solving
Tools & Technologies:	Git (Basic), VS Code

Education

GITAM University, Visakhapatnam, AP

2024 – 2028

Bachelor of Science in Computer Science

GPA: 8.23

Relevant Coursework: Introduction to Computing, Programming Fundamentals, Object-Oriented Programming, Data Structures, Algorithms, Discrete Mathematics, Database Management Systems, Software Design and Development, Problem Solving using DSA, Algorithm Analysis.

Academic Projects

Banking Management System

- Developed a responsive Banking Management System with secure account creation, login authentication, and a user dashboard.
- Implemented core banking features including money transfer, loan request with EMI calculation, loan repayment, and transaction history tracking.
- Built an Admin Control Panel with functionalities to approve/reject loans, freeze/unfreeze accounts, block/delete users, search accounts, and monitor total bank balance.
- Designed a modern mobile-friendly UI/UX with glassmorphism dashboard, notifications, EMI progress bar, dark/light mode toggle, and responsive layout.
- **Technologies Used:** C, HTML, CSS, JavaScript, File Handling.

AI Study Scheduler

- Developed an AI Study Scheduler web application that automatically generates optimized study roadmaps based on subjects, topic counts, and exam deadlines.
- Implemented a dynamic scheduling algorithm with weighted priority logic to distribute study topics across days while avoiding consecutive repetition of the same subjects.
- Designed a modern responsive UI with glassmorphism styling, real-time clock, interactive calendar with current-day highlighting, and dynamic subject/topic input generation.
- Integrated local storage for persistent user sessions, automated study plan generation, printable study schedules, and exam-deadline validation to improve productivity.
- **Technologies Used:** HTML, CSS, JavaScript, Local Storage.
